Summary

I was born in 1986 in Granada, Spain. I completed my Secondary Education in Granada, 2004, with the grade 8.8/10. Subsequently, I took Examination for Access to the University (June 2004), which is necessary to initiate university studies (Civil Engineering). I initiated my studies on Civil Engineering on October 2004. During my studies, I took subjects such as *Physics, Mechanics, General Geology, Geomorphology and Geology applied to the Engineering, Soil Mechanics and Rocks, Science and Technology of Materials, Geotechnics and Foundations, Numerical Analysis, Mathematics and Statistics*. During 2010 and 2011, I attended English lessons to prepare for *First Certificate in English* examination (University of Cambridge), which I obtained in June 2011. As a complement of the graduate studies, I attended to different courses and workshops on office software, Research and Development in Civil Engineering and technology implementation in underdeveloped countries.

I have been unemployed since completion of my graduate studies on February 2011. During this time I have been applying for grants for postgraduate research, as well as positions in private companies. I am strongly motivated to work abroad and willing to have international work experiences.
